Food and Agriculture Organization of the United Nations 2018-10-15 More than twenty years ago, the Food and Agriculture Organization of the United Nations contributed to the growing recognition of the role of pollination in agricultural production, with the publication of "The Pollination of Cultivated Plants in the Tropics". Since that time, the appreciation of pollinators has grown, alongside the realization that we stand to lose them. But our knowledge and understanding of crop pollination, pollinator biology, and best management practices has also expanded over this time. This volume is the first of two "compendiums for practitioners", sharing expert knowledge on all dimensions of crop pollination in both temperate and tropical zones. The focus in this first volume is on applied crop and system-specific pollination.

**Bosch** Virginia Pitts Rembert 2012-05-08 Hieronymus Bosch was painting frightening, yet vaguely likable monsters long before computer games were ever invented, often including a touch of humour. His works are assertive statements about the mental illness that befalls any man who abandons the teachings of Christ. With a life that spanned from 1450 to 1516, Bosch experienced the drama of the highly charged Renaissance and its wars of religion. Medieval tradition and values were crumbling, paving the way to thrust man into a new universe where faith lost some of its power and much of its magic. Bosch set out to warn doubters of the perils awaiting any and all who lost their faith in God. His favourite allegories were heaven, hell, and lust. He believed that everyone had to choose between one of two options: heaven or hell. Bosch brilliantly exploited the symbolism of a wide range of fruits and plants to lend sexual overtones to his themes, which author Virginia Pitts Rembert meticulously deciphers to provide readers with new insight into this fascinating artist and his works.
