Politics and the English Language George Orwell 2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst

the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, *Orwell's Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' – *Irish Times*

Faith of a (woman) Writer Hofstra University 1988 Reflecting the salient undercurrents of contemporary research on women writers, this volume is an appraisal of the work of the writer as woman and presents critics' perceptions about how women writers have dealt with the complexity of changing female visions in the twentieth century. Each of the thirty-four essays, contributed by some of today's most distinguished writers, speaks to the work of a particular twentieth-century woman writer, and each constitutes a contribution to the scholarly debate. Questions are raised as to the appropriate posture a critic should adopt, and whether a critic of women's writing should deal with the work as the product of a woman's hand, dwelling on the sensibilities of the female consciousness, or assume that the proper point of departure remains the artistic and aesthetic norms that have emerged from generations of male-defined practice.

Contemporary Research Topics in Nuclear Physics Da-Hsuan Feng 2012-03-22 This volume contains the proceedings of a workshop held at Drexel University from September 1 to September 3, 1980, under the joint auspices of Drexel University, The University of Tennessee and Vanderbilt University. The workshop dealt with subjects of topical importance to the nuclear physics community: high spin phenomena, heavy ion reactions, transfer reactions, microscopic theories of nuclear structure and the interacting boson model, and miscellaneous topics. This proceedings contains all of the invited papers plus short manuscripts expanding on the materials of the invited papers. A total of about 85 participants came to the workshop. The format of the conference was kept informal on purpose, so as to facilitate the discussions. Unfortunately, these discussions, at times intense, could not be included in this volume due to the lack of secretarial help during the meeting. A great deal of current information was exchanged during the conference. However, the full impact of a conference can only be realized when the proceedings have been published and read by participants as well as other colleagues in this field of physics who were not in attendance. We sincerely hope that these proceedings will be useful in this regard.

A Manual for Writers of Research Papers, Theses, and Dissertations, Seventh Edition Kate L. Turabian 2009-08-14 Dewey. Bellow. Strauss. Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her

Manual for Writers of Research Papers, Theses, and Dissertations, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's Manual has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level—from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth—the gifted team behind *The Craft of Research*—and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet. Booth, Colomb, and Williams significantly expand the scope of previous editions by creating a guide, generous in length and tone, to the art of research and writing. Growing out of the authors' best-selling *Craft of Research*, this new section provides students with an overview of every step of the research and writing process, from formulating the right questions to reading critically to building arguments and revising drafts. This leads naturally to the second part of the Manual for Writers, which offers an authoritative overview of citation practices in scholarly writing, as well as detailed information on the two main citation styles ("notes-bibliography" and "author-date"). This section has been fully revised to reflect the recommendations of the fifteenth edition of *The Chicago Manual of Style* and to present an expanded array of source types and updated examples, including guidance on citing electronic sources. The final section of the book treats issues of style—the details that go into making a strong paper. Here writers will find advice on a wide range of topics, including punctuation, table formatting, and use of quotations. The appendix draws together everything writers need to know about formatting research papers, theses, and dissertations and preparing them for submission. This material has been thoroughly vetted by dissertation officials at colleges and universities across the country. This seventh edition of *Turabian's Manual for Writers of Research Papers, Theses, and Dissertations* is a classic reference revised for a new age. It is tailored to a new generation of writers using tools its original author could not have imagined—while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian.

The Language of Fiction Emar Maier 2021-10-15 This volume brings together new research on fiction from the fields of philosophy and linguistics. Fiction has long

been a topic of interest in philosophy, but recent years have also seen a surge in work on fictional discourse at the intersection between linguistics and philosophy of language. In particular, there has been a growing interest in examining long-standing issues concerning fiction from a perspective that is informed both by philosophy and linguistic theory. Following a detailed introduction by the editors, *The Language of Fiction* contains 14 chapters by leading scholars in linguistics and philosophy, organized into three parts. Part I, 'Truth, Reference, and Imagination', offers new, interdisciplinary perspectives on some of the central themes from the philosophy of fiction: What is fictional truth? How do fictional names refer? What kind of speech act is involved in telling a fictional story? What is the relation between fiction and imagination? Part II, 'Storytelling', deals with themes originating from the study of narrative: How do we infer a coherent story from a sequence of event descriptions? And how do we interpret the words of impersonal or unreliable narrators? Part III, 'Perspective Shift', focuses on an alleged key characteristic of fictional narratives, namely how we get access to the fictional characters' inner lives, through a variety of literary techniques for representing what they say, think, or see. The volume will be of interest to scholars from graduate level upwards in the fields of discourse analysis, semantics and pragmatics, philosophy of language, psychology, cognitive science, and literary studies.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. The Yellow Wallpaper The Yellow Wallpaper 2021-01-01 The *Yellow Wallpaper* is a 6,000-word short story by the American writer Charlotte Perkins Gilman, first published in January 1892 in *The New England Magazine*. It is regarded as an important early work of American feminist literature for its portrayal of how women's health (both physical and mental) were perceived in the 19th century. Written as a collection of journal entries, the story details the narrator's descent into madness. Her husband has rented a mansion for the summer. A physician, he has forbidden his wife from working or writing whilst she recovers from depression. She offers up many suggestions that might help her, such as exercising and socialising, but she is dismissed as not able to offer ideas on her own condition. Alone in the upstairs nursery, our narrator becomes fixated on the wallpaper in the room, describing in detail its colour, smell, and pattern. Eventually, she begins to see a figure in the design, and comes to believe that there is a woman behind it; a woman who, like her, was confined there against her will. Charlotte Perkins Gilman said that the idea for the story came from her own experience as a patient who suffered years of depression. Like Jane in the book, she had been prescribed a 'rest' from work, and was only allowed 2 hours of mental stimulation a day.
